This new beauty range from skin care experts Amway has really impressed us here at Handbag Towers. Taking inspiration from the elements, this new beauty range is easy to understand, contains gentle formulas and wearable make-up colours.

Here is the idea; the Air collection is for skin rejuvenation and anti-ageing, the Water range hydrates, Earth balances and calms while Fire targets specific problem areas. Containing minerals and natural ingredients I

particularly love the Water range which will give dull skin a good quick dose of hydration. It smells wonderful and absorbs into very dry skin quickly. The day cream with SPF 15 was a pleasure to use and the creamy cleanser won't strip your skin.

I'm also now a huge fan of Amway's make-up range with the oil-free foundation - which is extremely blendable, wearable and lightweight - is perfect for the woman like me who doesn't like a full heavy base. The lipsticks are also highly pigmented, soft and long-lasting.

If you are a fan of the Artistry skin care line from Amway or you need a new affordable range to buy into, then Beauty Cycle is a great place to start.
